

EAGLE Back Extension

Specifications

| | |
|------------------------|--------------------------------------------|
| Product Number | 11100 w/Total RLD; 11101 w/Start RLD |
| Dimensions (L x W x H) | 54" x 47" x 58" (137 cm x 119 cm x 147 cm) |
| Machine Weight | 613 lbs. (279 kg) |
| Weight Stack | 305 lbs. (138 kg) |

FOCUS ON THE TARGET

The Eagle Patented pelvic stabilization system utilizes adjustable foot brace which allows the user to "lock into" the hip pad, causing hip extensor engagement for optimal pelvic stabilization.

PROMOTES LOWER BACK USE

The lumbar level axis of rotation promotes the use of the lower back (spinal erectors) as the prime movers. Starting positions provided every 10°.

EASY ADJUSTMENT

From small to tall without getting off the machine. The gas spring-assisted adjustable footbar accommodates user height variation and allows adjustment from the seated position.

CONTROLLED LUMBAR EXTENSION

Lumbar extension – but not too much. The CYBEX design promotes proper and controlled movement into extension. Curved lumbar pad encourages lumbar extension/flexion while minimizing the possibility of excessive extension.  Another CYBEX safety design feature.

STRESS WITHOUT INJURY

All strength training is the application of stress. CYBEX designs products to apply the appropriate amount of stress to produce the desired training effect but does it in a way that reduces the chance of injury. Such is the case with the acclaimed CYBEX Range Limiting Device (RLD).
