

PRO³ Treadmill

LOW PROFILE COMMERCIAL WORKHORSE

The Pro³ Treadmill is a club owner's dream machine. Its unmatched durability makes it the energizer-bunny of treadmills – it **just keeps on going** after many of our competitors' machines have stopped.

LOW STEP UP

Gives a sturdy look and feel. The low, clean style of the Pro³ that looks great in the gym results from an elevation system that retracts into the frame. The step up height of only 7 1/2" is under the normal stair height in the US. The advantage is a treadmill that is less intimidating – important for **seniors and beginning exercisers**.

EASY TO OWN – EASY TO USE

All about the details. We've thought of a lot of little details that users might not notice but that add up to a better treadmill. The power cord stored within the frame exposes only the length needed to reach the outlet. There is a pair of pick up handles at the rear of the unit in case you want to move the treadmill around. Drive belt edges are covered to prevent fray and to keep dirt from collecting between the deck and belt (these also keep things like fingers and towels from getting caught).

Specifications

Product Number	Pro ³
Speed Range	0.5 – 12.4 MPH (0.8 – 20 kph)
Incline Levels	-2% – 15%
Running Area (L x W)	60" (152 cm) x 20" (50cm)
Motor	3 HP continuous duty DC Drive
Dimensions (L x W)	81" (206cm) x 32" (81cm)
Step-up Height	7.5" (19 cm)
Display	Graphic Display of Profile, Distance, Calories, METs, Pace, Heart Rate; Lower display of Time, Incline and Resistance Level
Programs	6 Standard programs with 10 levels each controlling both incline and resistance; visit us online for Program details
Heart Rate Monitoring	Wireless and Contact Grips
Connectivity	CSAFE (Fitlinxx certified)
Max User Weight	400 lbs (181kg)
Power	110V, 115V, 208V-220V, 230V
Compliance	FCC, ETL listed to UL 1647, EN, CE, ASTM, CSA

INTELLIGENT DECK

Built smart to avoid jarring the back. The deck of the PRO³ is soft at landing, hard in the middle, and rigid at the toe-off, to exactly match the body mechanics of a runner. To dampen the shock effect, we use an advanced-technology elastomer – we call it the IS3 Intelligent Suspension System, and only CYBEX has it. Our competitors soften their treadmills' entire deck causing a "trampoline" effect that can actually lead to injury.

HEAVY DUTY DESIGN

Can take the punishment. The 3" crowned rollers on the CYBEX Pro³ treadmill provide long roller bearing life (250,000 miles) and a deck that flips and rotates giving up to four wear surfaces. The steel side bed covers won't bend or break. **This is a treadmill that is built to last.**
