

750A Arc Trainer

COMMERCIAL LOWER BODY CROSS TRAINER

A Commercial High End cross trainer **designed to concentrate on the lower body**. The 750A Arc Trainer has all of the features of the Total Body Arc Trainer without the Arm motion. Popular with coaches and trainers, the Lower Body Arc is often chosen because it gives added workout flexibility.

CROSS TRAINERS VS ELLIPTICALS

Not all cross trainers are created equal. Cross training refers to working various parts of the body by combining different exercises in a variety of ways. Typically one activity or sport trains certain parts of the body but not others. Cross training aims to eliminate this. Cross trainers are generally non-impact machines – sometimes called “ellipticals” – which refers to a specific motion. **All ellipticals are cross trainers but not all cross trainers are ellipticals.**

BURNS MORE CALORIES

More results in less time. Research shows that the CYBEX Arc Trainer burns more calories than any other cross trainer or elliptical cross trainer tested. The science behind the Arc Trainer’s big calorie burn is the Arc motion. It engages the right muscles – quads and glutes – that demand lots of energy from the body when they are called upon to work. That means big calorie burn. And... because the Arc is demanding of the muscles – not the joints, it can be used longer without putting a strain on the knees, hip or back.

Specifications

Product Number	750A
Resistance Range	18 – 900 watts
Incline Levels	21
Stride Length	24”
Dimensions (L x W x H)	77” (196cm) x 28.5” (72cm) x 62.5” (159cm)
Display	Graphic Display of Profile, Distance, Calories, Calories/hr, METs, Watts, Strides/min, Heart Rate, Time, Incline and Resistance Level
Programs	Quick Start, plus 9 programs with 10 levels including Heart Rate control plus 2 Advanced programs and 9 Custom Programs; visit us online for Program details
Heart Rate Monitoring	Wireless and Contact Grips on handle bars
Connectivity	Dual CSAFE (Fitlinxx certified)
Max User Weight	400 lbs (181kg)
Power	Self Powered
Compliance	ETL listed to UL 1647, FCC Class B, ASTM, EN 957, CE Low Voltage Directive, EMC and ROHS

THREE MACHINES IN ONE

Train for strength, power, endurance, cardio, and weight loss.

The CYBEX Arc Trainer offers broad incline and resistance ranges which mean it is really 3 machines in one. At the lower incline levels, the “glide” is a cross country skier. In the mid-range levels, the motion is a “stride” (like an elliptical except with proper positioning). At the high levels, the “climb” of a stepper or climber. Glide, Stride, and Climb. And... lots of programs also make the Arc Trainer fun to use.

EASY ON THE JOINTS

No more “elliptical knees”. Unlike other cross trainers on the market the patented Arc pattern of motion allows the hip and knee to move synchronously while the foot stays under the knee reducing joint pains and providing a more comfortable workout.
