

750C Upright Bike

BUILT COMMERCIAL – USED EVERYWHERE

Versatile upright bike with commercial durability and performance versatility for any environment and for any user. The 750C has the same high tech look of the rest of the CYBEX cardiovascular family of products to create a gym that looks like it belongs together. Even though users vary in size, weight, and fitness goals... only one bike will give them all the workout they are looking for... the CYBEX 750C.

ONE BIKE – MANY PROGRAMS

Ride outside or train for the Tour de France. This is the most unique bike in the industry. With three modes of operation and 9 programs with 21 levels, personal trainers love it in Constant Power mode. Isokinetic mode is for serious athletic training and rehabilitation training. The Bike Mode is just like a Sunday afternoon bike ride.

BEGINNER TO OLYMPIAN

The lowest starting level and the highest resistance. For those who never rode a bike before and those who are preparing for the Olympics, the CYBEX 750C is the perfect piece of equipment to train on. The most deconditioned user or rehab patient can use it safely because of the low power input requirement (20 Watts) and... it goes up to 900 Watts (to make a grown man cry). All possible because of the CYBEX self-tensioning drive. Belt tension is important because a lot of belt tension is needed to create a high power training tool. But... belt tension creates drag... and drag can drive up heart rate for beginning cyclists. The answer is the CYBEX self-tensioning drive.

Specifications

Product Number	750C
Resistance Range	20 – 900 watts
Modes of Operation	Constant Power, Bike Mode and Speed Control (isokinetic)
Seat Adjustment	Single handed adjustment from seated position
Dimensions (L x W x H)	48" (122cm) x 23" (58cm) x 61" (155cm)
Display	Large LED Display of Profile; Message bar display of Distance, Calories, Calories/hr, METs, Watts, RPM, Heart Rate; Lower display of Time, Incline and Resistance Level
Programs	Quick Start, plus 9 programs with 21 levels including Heart Rate control plus 2 Advanced programs and 9 Custom Programs; visit us online for Program details
Heart Rate Monitoring	Contact Grips and Wireless
Connectivity	Dual CSAFE (FitInxx Certified)
Max User Weight	400lbs (181 kg)
Power	Self Powered
Compliance	FCC Class B, ETL listed to UL 1647, ASTM, CSA, EN 957, CE – Low Voltage, EMC and RoHS Compliant

RUGGED DURABILITY

For low maintenance. With a welded frame made from forged steel, the CYBEX 750 bikes have a three piece heavy duty mountain bike crank that makes them durable enough for rugged mountain terrain. In a gym setting, this construction translates to low low low maintenance. And... CYBEX engineers even designed the enclosures so that sweat is directed away from the bike mechanism.

DETAILS

Little things add up to a big difference. We've thought of a lot of details that both users and owners appreciate. Multi-position design of handle bars accommodates riding styles from upright to aero with two sets of contact heart rate grips so HR can be monitored in any position. The optional Personal Entertainment Monitor with iPod compatibility turns itself off to save energy and prolong monitor life. And... the CYBEX bike has wheels in the front – so it can be moved around whenever the floor design is changed.
